

PSimPy - Predictive and probabilistic simulation with Python

Hu Zhao, Anil Yildiz, Nazanin Bagherinejad, Julia Kowalski
Chair of Methods for Model-based Development in Computational Engineering, RWTH Aachen University, Germany
Gaussian Process, Multiphysics Simulation

Summary

Come with a simulator, leave with a workflow

Features

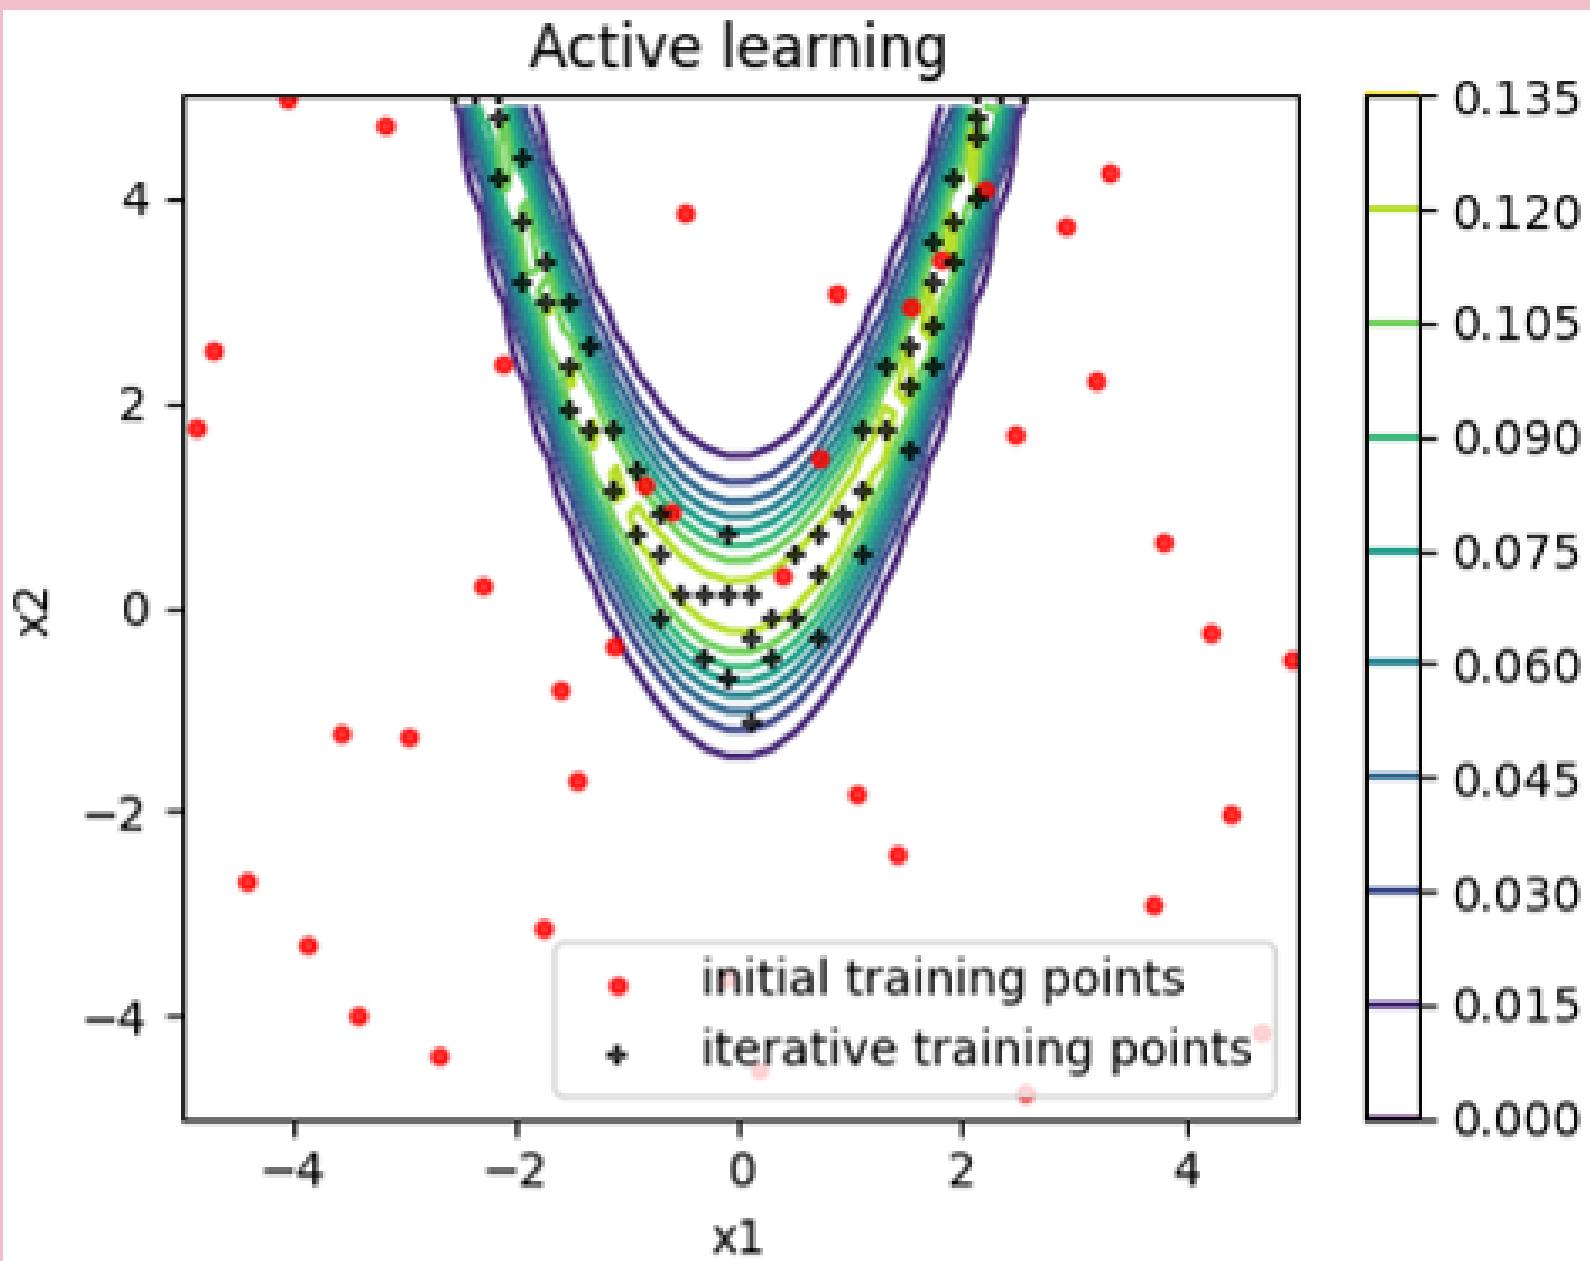

- Python wrapper
- Robust GP Emulation
- Lightweight Substitute = Fast Evaluations

Emulate your simulation and save compute time!

	training	evaluation	2500 evals
simulator	-	32 min	56 days
emulator	4.5 days	0.05 sec	2 min

Software in Action

Quantify uncertainty. Identify key drivers. Calibrate with data.

Want to build unified, robust and sustainable UQ workflows?
