

Want to build FAIR, reproducible landslide susceptibility maps? ^[1]

SUSCEPTIBILITY & HAZARD MAPPING FRAMEWORK

Highlights

**Robust ML for hazard mapping.
Save weeks of manual geoprocessing!**

- Random Forest
- Automated dataset generation and preprocessing
- GUI and script-based versions
- Modular, open-source, FAIR-by-design
- Full run logging for reproducibility

In Action

Quantify susceptibility, identify key drivers, validate against real inventories.

Open source and built for FAIR research.
